**Project: Royal Adelaide Hospital, Australia**

**Summary:** 440-bed hospital provides comprehensive range of the most complex clinical care for an estimated 85,000 inpatients and 400,000 outpatients every year.

**Operational Response:** The Royal Adelaide Hospital was built with 100% single overnight bedrooms are single with an en-suite bathroom, giving the hospital the ability to protect and isolate patients where needed. Alder Hey is continuing its vital work during the COVID-19 period, having adopted strict rules on visiting and isolation. The hospital has put together a video for parents to share with their children to help explain the virus, and clear information is available on the hospital website and dedicated support lines are allowing the hospital to continue to care for sick and vulnerable children to help explain the virus, and clear information is available on the hospital website.

**Project: Alder Hey Children’s Hospital, UK**

**Summary:** The brand new Alder Hey in the Park hospital in Liverpool was opened in October 2015 with 270 beds including 48 critical care beds and 16 operating theatres. It is one of Europe’s biggest purpose-built children’s hospitals.

**Operational Response:** Alder Hey Children’s Hospital is a key centre for paediatric treatment in the UK. Completely rebuilt between 2013 and 2015 and is part adjacent to the old hospital, it cares for more than 330,000 children, young people and their families every year. 75% of bedrooms are single with an en-suite bathroom, giving the hospital the ability to protect and isolate patients where needed. Alder Hey is continuing its vital work during the COVID-19 period, having adopted strict rules on visiting and isolation. The hospital has put together a video for parents to share with children to help explain the virus, and clear information is available on the hospital website and dedicated support lines are allowing the hospital to continue to care for sick and vulnerable children whilst keeping parents, carers, staff and patients as safe as possible.

**Project: Denver Commuter Rail**

**Summary:** Delivering the first public transport connection from Downtown Denver to Denver airport; reducing highway congestion. Since opening, the A, B & G lines have carried more than 30 million users. Lines and stations encouraged economic growth and residents settling in Denver’s suburbs.

**Operational Response:** With the final line opened to the public in April 2019, the Denver Commuter Rail system has substantially reduced the number of passengers as nine buses – substantially reducing traffic congestion around the city and sparked regeneration of both business and residential areas. During the COVID-19 crisis, the rail system continues to carry a reduced number of passengers and is continuing its vital work during the COVID-19 period, having adopted strict rules on visiting and isolation. The hospital has put together a video for parents to share with children to help explain the virus, and clear information is available on the hospital website and dedicated support lines are allowing the hospital to continue to care for sick and vulnerable children whilst keeping parents, carers, staff and patients as safe as possible.

**Project: Sydney Light Rail**

**Summary:** One tram carries the same number of passengers as nine buses – substantially reducing traffic in the central city area and suburbs.

**Operational Response:** The last stage of the Sydney Light Rail project was opened to the public in April 2020. Despite Sydney operating in a lockdown situation, it was deemed important for all lines to be open to allow essential workers to travel safely across the city. The rail system has put a number of measures into place to protect drivers and passengers. These include automatic door opening at stations so passengers don’t have to press any buttons to enter or exit the train, stringent cleaning regimes, contactless card validation and automated pedestrian crossings operational 24 hours a day. NSW Government Minister for Transport Andrew Constance opened the new line, commenting, “The railway is being opened, importantly, so that those critical workers across our community are able to get to work at this time.”

To all our partners and clients, the people on the ground who are keeping things moving, and all their families, we say thank you, and we hope you stay safe and well.
